

The simplest ideas are often the best

‘Slimline’ Range

The versatile and robust answer
to all your liquid transfer needs

Slimline range - efficient and adaptable metal pumps

Machined from solid material, with a choice of solid Aluminium, Stainless Steel or exotic metals including Hastelloy[®], Flotronic's fully drainable Slimline pumps can be used in a wide range of industries for any liquid transfer, including chemical, cosmetic, paints and coatings, pharmaceutical, adhesive, food and beverage, sanitary and hygienic applications.

They have proved particularly effective in the transfer of viscous products such as cosmetics and foodstuffs including dairy products and mayonaise.

These pumps are especially suited to applications where hygiene is paramount and where the avoidance of product hold-up is important.

Flotronic's Slimline pumps may be more compact than competitor AODD pumps, but they're just as capable - offering all the benefits for which Flotronic pumps are renowned, including Flotronic's innovative, easy-maintenance, 'ONE-NUT' design which allows pump maintenance in a matter of minutes.

Performance to match any requirements.

- compact design ideal when space is limited
- outside surfaces can be easily cleaned
- a range of ½" to 3" connections, with 7", 10" or 12" diameter diaphragms, providing in-line adaptability
- screwed, hygienic or flanged connections to suit particular applications
- ease of maintenance through:
 - Flotronic Pumps' 'ONE-NUT' technology
 - readily accessible ball valves
 - pump air-valve easy to maintain when in-line

Flotronic 'One - Nut' pumps - The simplest ideas are often the best

Flotronic 'Slimline'

Performance to match any requirements *(continued)*

- a choice of materials to suit any application including Stainless Steel, Aluminium and also exotic metals including Hastelloy®
- ATEX 94/9/EC compliance up to Gas Group IIC
- crevice free design with no internal welding - ideal for hygienic applications and cleaning
- fully drainable body
- surface finish to customer specification available with a range of polished options
- optional hot water/steam jacket
- with environmental protection in mind, Diaphragm Rupture Protection and fully pneumatic Alarm Systems are available
- optional high temperature diaphragm allows for a 135 °C (275 °F) maximum operating temperature
- self-priming 3.6m/12ft dry and 8m/26ft wet.

All of which help you to:

- transfer an extensive variety of materials efficiently across a range of industries
- reduce down time and cleaning costs
- maintain and even improve sanitary levels on site.

Applications:

- Chemical
- Cosmetics and personal care
- Paints
- Pharmaceutical
- Adhesive
- Hygienic
- Food and beverage.

Flotronic's commitment to high quality management of the processes that create and control our products has been recognised in the achievement of the ISO 9001 accreditation, the internationally recognised standard for quality management of businesses.
